

Traffic Engineering for Law Enforcement

Course Instructor:

Larry Hagen, P.E., PTOE

Hagen Consulting Services, LLC

Larry@HagenConsultingServices.com

229-237-3269

Self Introductions

- ❑ Who are you?
- ❑ Who do you work for and what you do?
- ❑ What you want to get out of the course?
- ❑ What is the saddest thing you have seen out on the street?
- ❑ What is the strangest thing you have seen people do out on the street?

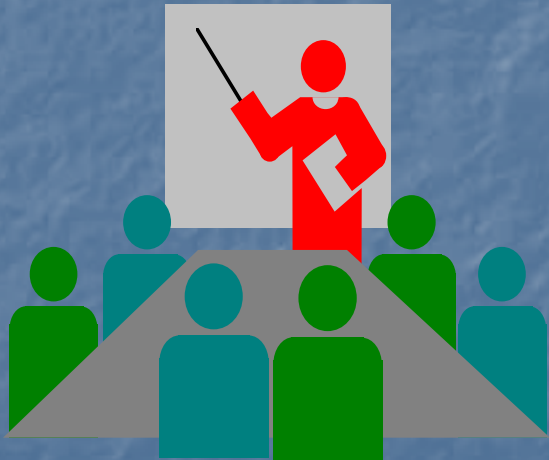

Logistics

- ❑ Health and safety (emergency exits, procedures for evacuation, etc.)
- ❑ Please silence cell phones/pagers/radios
- ❑ Breaks (when, restrooms, telephones)
- ❑ Lunch arrangements
- ❑ Other site-specific issues

This is a Workshop!

Expect to do some work!

DISCUSSION

- Ask your questions as you have them, please!
- Let's have **DIALOG** rather than monolog.
- "Parking Lot" for questions to be addressed later in workshop
- Facilitated questioning and discussions

Course Objectives

- Introduce the fundamentals of traffic engineering
- Foster an understanding of why things are the way they are
- Initiate a dialog where enforcement and engineering can work more intelligently toward our common goal
- **SAVE LIVES**

This Workshop Will NOT:

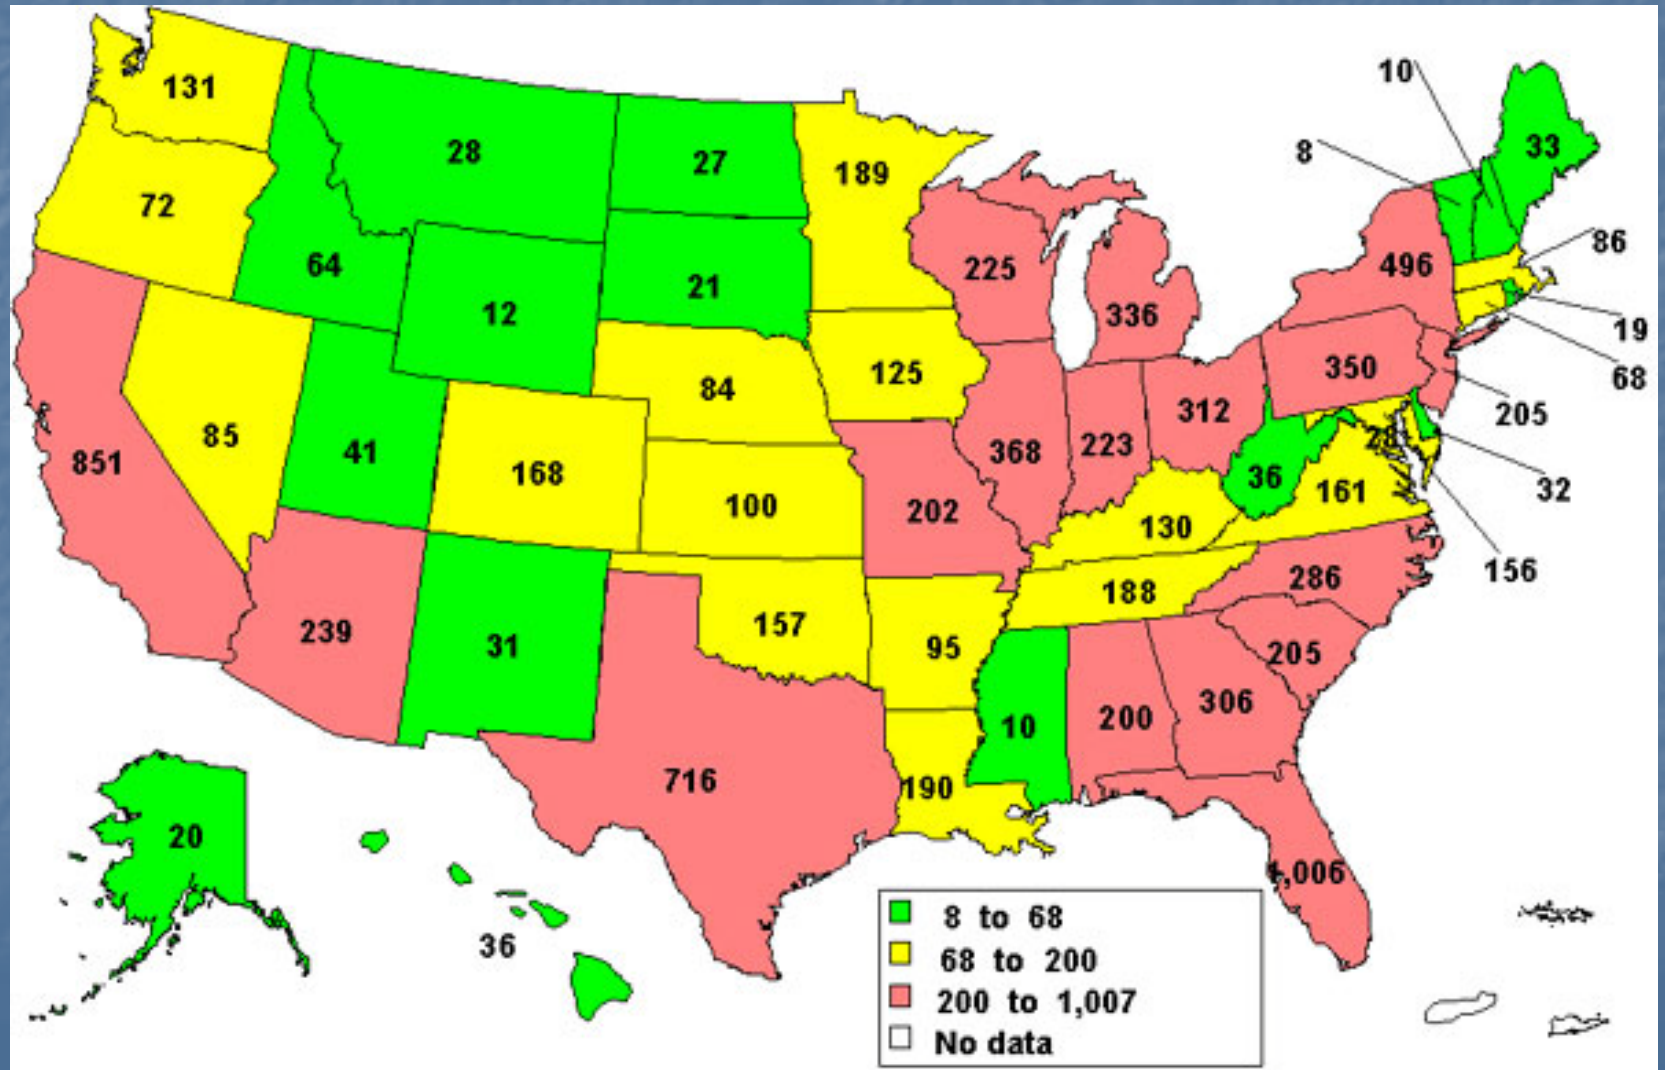

- Make you a traffic engineer
- Qualify you to make "engineering judgment" or design decisions
- Go past 16:30
- Be like anything you have seen before

Why should we care about
traffic safety anyway?

We're #1

We're #1

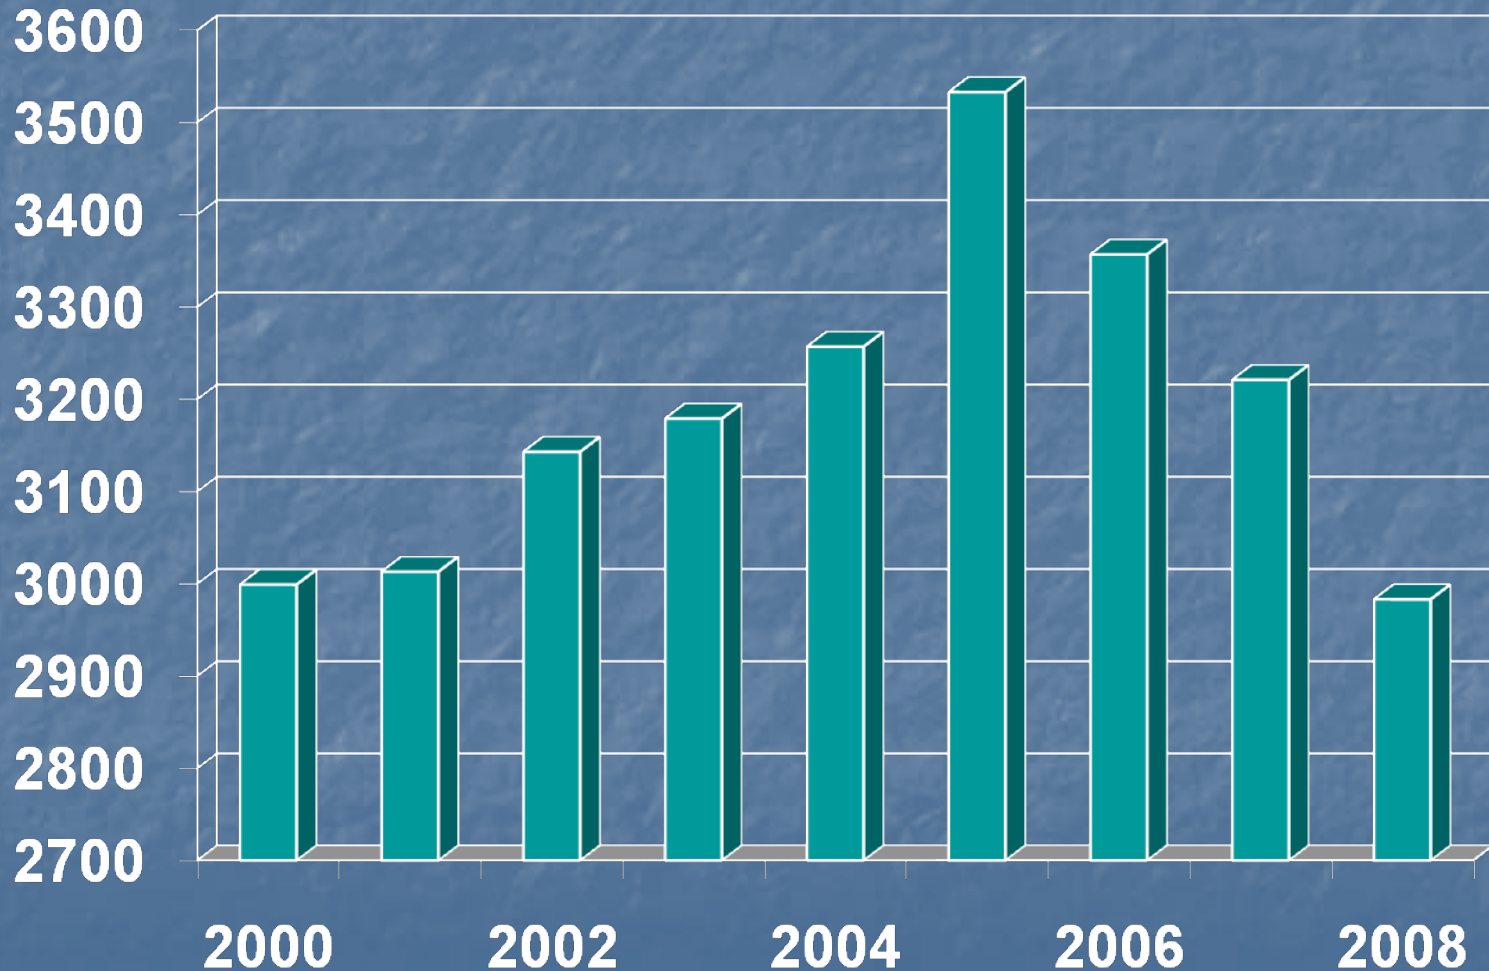

We're #1

2008 Crash-Related Fatalities

| State | @ Intersection | Total Fatalities |
|------------|----------------|------------------|
| Florida | 919 | 2978 |
| California | 764 | 3434 |
| Texas | 642 | 3382 |
